

Choosing Salerno as a conference table means combining technological features and great appearance. Because with Salerno, technology is placed at the service of form to create highly elegant, yet exceptionally functional solutions. However the work in the office is performed, and in whatever way it changes over time, Salerno always offers top-quality performance. The design of the system is based on a specific concept: providing an excellent aid that can change as work requirements change to offer an ideal operational framework. The conference tables, with oval or rectangular shape, are available in large sizes: the tabletop can be up to 6,20 m in length, and is divided into four sections.

Salerno Boardroom Tables

Technical description

Salerno is a system of desks and modular meeting tables.

The structure is composed by horizontal beams in extruded aluminium and legs in die-cast aluminium. The structure can be polished or black painted.

Structure

The main beam is in extruded aluminium with polished or painted finish and with a decorative black element that goes along longitudinally. Beams are available in 16 lengths which goes from a minimum length of 316 mm to a maximum of 2198 mm.

Legs are made of die cast aluminium with polished or black painted finish. Glides are in chromed plastic material and are height adjustable for the positioning of the table.

Connectors allow to join the beams and the basements with different inclinations in order to allow several configurations.

Brackets

Supporting brackets are made of die cast aluminium with polished finish and can be positioned along the main beam.

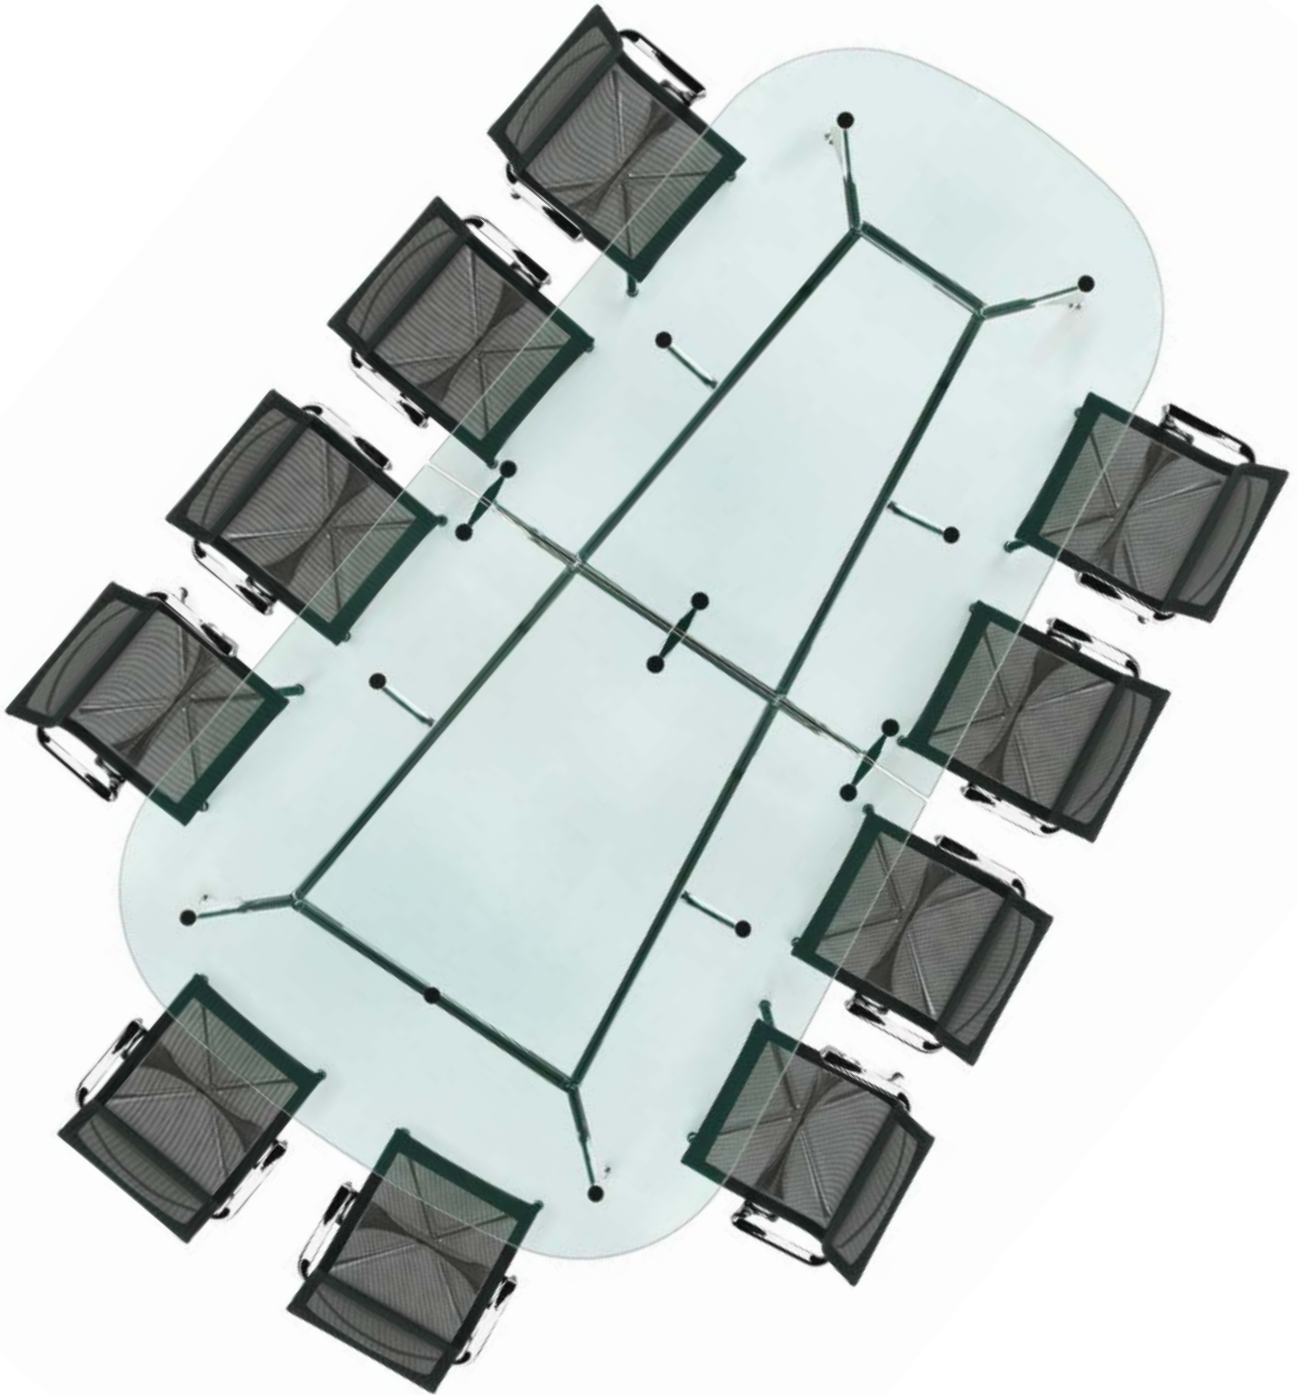

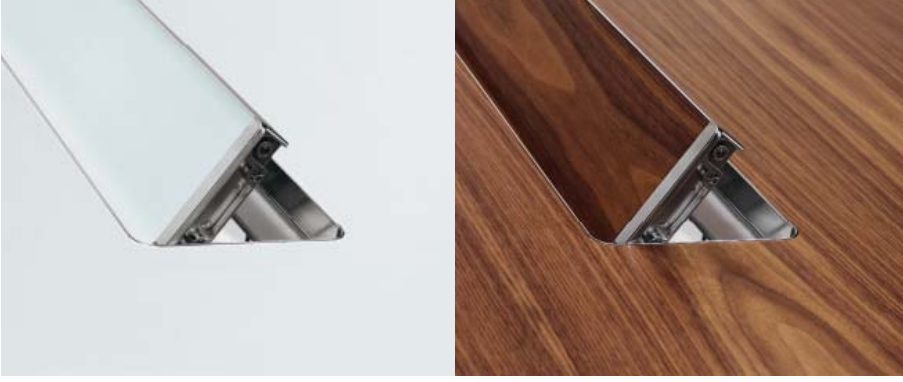

Top

The tops are available in different modular sizes and finishes.

Clear glass with a thickness of 15 mm, with rounded angles; acidated underpainted glass in white colour with a thickness of 15 mm; natural oak wood or American black walnut characterized by a 28 mm thickness and by a solid wood edge; laminate tops are available in three colours: white, light grey and dark grey. Top thickness is 22 mm and the perimeter edge is in shockproof plastic material.

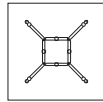

Flip door

The flip door, 50 cm length, and positioned in the central part of the top, is composed by an aluminium frame and a central element in the same finish of the top. It has a bilateral opening and a tub under the top for electric cables.

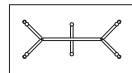

Versatility and flexibility are key features of the Salerno system. The individual but common components create the ability to conceive tailored solutions of any shape or dimension in order to meet requirements without limitation. Added to this versatility is the availability of a wide range of finishes and colours, in laminate, glass or veneer. Salerno: total freedom.

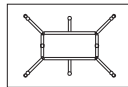

Dimensions

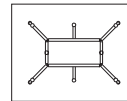

UT201.
Square meeting table
length from 90 to 220 cm

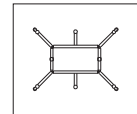

UT210.
Rectangular meeting table
depth 100 cm
length from 180 to 480 cm

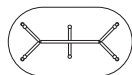

UT212.
Rectangular meeting table
depth 120 cm
length from 180 to 620 cm

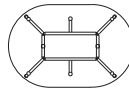

UT214.
Rectangular meeting table
depth 140 cm
length from 180 to 620 cm

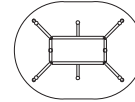

UT216.
Rectangular meeting table
depth 160 cm
length from 180 to 620 cm

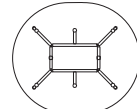

UT310.
Oval meeting table
depth 100 cm
length from 180 to 480 cm

UT312.
Oval meeting table
depth 120 cm
length from 180 to 620 cm

UT314.
Oval meeting table
depth 140 cm
length from 180 to 620 cm

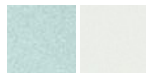

UT316.
Oval meeting table
depth 160 cm
length from 180 to 620 cm
